

Quality Policy – Plasel Plastic

Plasel management is committed to providing its customers with high-quality products and services, while complying with customer requirements, applicable standards, and regulatory requirements, and while maintaining employee safety and environmental protection.

The company operates in accordance with integrated management systems based on the standards
ISO 9001,
ISO 14001, and
ISO 45001,
and is committed to the continuous improvement of its performance.

To achieve this, Plasel management is committed to acting according to the following principles:

Compliance with Customer and Regulatory Requirements

The company will ensure full compliance with customer requirements, applicable laws, regulations, and standards relevant to its products and operations in the markets in which it operates.

Occupational Health and Safety

The company is committed to providing a safe and healthy working environment for its employees, identifying safety risks in work processes, and working to reduce them through appropriate procedures, training, and control measures.

Product Quality and Quality Control

The company implements quality control processes that include:

- Raw material inspections
- In-process production controls
- Finished product inspections

These activities are carried out using appropriate testing equipment and in accordance with applicable standards and customer requirements, in order to ensure the consistent supply of compliant and reliable products.

Traceability

The company implements identification and traceability systems for raw materials, production batches, and finished products. These systems enable tracking of the

manufacturing process throughout the supply chain and allow for rapid response in the event of quality deviations.

No: QA-5.2

Issued: 11/3/2026

Prevention of Hazardous Materials Use

The company works to prevent the use of hazardous or restricted substances in its products in accordance with legal and customer requirements and performs control and monitoring of raw materials purchased from suppliers.

Supplier Management

The company selects, evaluates, and monitors suppliers in order to ensure that raw materials and services meet the required quality, safety, and environmental standards.

Environmental Protection

The company is committed to minimizing the environmental impact of its activities, including waste reduction, efficient use of resources, and continuous improvement of its environmental performance, while maintaining ongoing monitoring of environmental indicators.

Continuous Improvement

The company continuously improves its processes, products, and services through quality metrics, data analysis, handling of non-conformities, event investigations, and root-cause learning.

Management commits to providing the necessary resources for the continuous improvement of the Quality, Safety, and Environmental Management System.

Management will implement training and qualification programs for employees at all levels in order to improve employee professionalism and awareness of procedures and work instructions.

The Quality Manager will be a member of the management team and will report directly to the CEO, working toward continuous improvement of the company's products and organizational processes.

The Quality Manager will be responsible for implementing the requirements of ISO 9001:2015 and for overseeing the application of FMEA.

The Quality Manager will also regularly review the requirements of the integrated management system and ensure their implementation throughout the organization.

Management will review the performance of the Quality Management System through periodic management reviews and internal audits.
